   if(obj == null && !(obj instanceof room)) return false;
   if(this == obj) return true;
   room r = (room)obj;
   return this.getNumber2() == r.getNumber2();
```

程序运行至哪部分会出现错误及其处理方式

1.房间数组的长度是以老板定义的房间数量,如果开始登录的是老板的账号则可以修改房间数量,无限修改,但是一旦有顾客开房就不能修改了,否则顾客 开的房间会被抹除,变成新的,无法处理

2.本来输入的东西点确定之后都是在主页面显示的,但是点确定后,在匿名内部类里的东西要不就是无法显示,要不就是移动到组件的位置才能显示,所以 又创建了两个界面,再用switch来确定该调用的方法

3.如果顾客名字过长会导致超出界面,无法显示或者被挡住,解决方案就是别整太长的名字

4.本来老板查询顾客信息是不会显示自己名字的,但是后面老板突然无法登了,原因是遍历hashmap找不到人就get(0),但是没顾客就无法get,解决方案是添加老板

jdk版本号

java version "19.0.1"
